

ELEVATION CAPITAL® VALUE FUND

The Value Fund is a Portfolio Investment Entity (PIE) that seeks to provide investors with long-term capital growth and income by directly investing in equities on a global basis, while at the same time adhering to a “Margin of Safety” investment philosophy. The strategy of the Fund is to mainly invest in shares (equity securities – including Preferreds and Convertibles) of entities trading at a discount in relation to the entities’ net asset value/intrinsic value”, with low debt levels”, and which have a history of paying dividends and/or returning capital to shareholders.

* A Preferred stock/share is a class of ownership in a corporation/company that has a higher claim on its assets and earnings than common stock/equity. Preferred shares generally have a dividend that must be paid out before dividends to common shareholders, and the shares usually do not carry voting rights. Preferred stock combines features of debt, in that it typically pays fixed dividends, and equity, in that it has the potential to appreciate in price.

Convertibles are securities, usually bonds or preferred shares, that can be converted into common stock / shares or equity. Convertibles are most often associated with convertible bonds, which allow bond-holders to convert their creditor position to that of an equity holder at an agreed-upon price. Other convertible securities can include notes and preferred shares.

** Net Asset Value / Intrinsic Value – is also referred to as “Private Market Value”. Collectively we define them as the value an informed buyer would pay to purchase assets with similar characteristics. We measure Net Asset Value/Intrinsic Value or Private Market Value by scrutinising on and off balance sheet assets, liabilities, and free cash flow. We also examine valuations and transactions in the public domain to formulate our view of possible future value.

*** Low Debt Levels – can be assessed relative to tangible and/or intangible assets, free cash flow, the industry in which an entity operates, or relative to peers within an industry.

AVERAGE ESG SCORE = 0.642*
(AS AT 28 FEBRUARY 2018)

The Fund utilises Thomson Reuters Eikon to report its Environmental, Social & Governance (ESG) scores. While it is not an investment criterion, we are increasingly mindful of the need to hold companies accountable for ESG performance and accordingly have added this disclosure for the benefit of our investors.

FUND PERFORMANCE (NET AND GROSS) VS. NZ CPI+5% PER ANNUM (GROSS) & MSCI ACWI VALUE INDEX (GROSS)

For comparative purposes we have detailed two informational benchmarks we consider relevant to underlying (and prospective) investors in the Value Fund. These are NZ CPI + 5% per annum (Gross Return) which we believe highlights to investors whether we are preserving and growing their real purchasing power overtime and the MSCI ACWI Value Index (Gross Return) in NZD terms*. It is important to consider that our portfolio does not track or follow any index (refer the Funds Active Share statistics on page 2), and we consistently operate with conservative cash levels. We would also highlight that these two informational benchmarks are not provided for performance fee calculations as there are no performance fees charged or payable within/by the Fund.

* Total Expense Ratio Definition: Total Expense Ratio (TER) expresses the expense ratio for a fund or unit of a fund against the average NAV (of the fund or unit respectively) over a given period in the past. The TER should reflect the past record, and should not be an estimate for the present or future. In other words, the TER is the annual percentage reduction in investor returns that would result from operating costs if markets were to remain flat and the fund's portfolio were to be held and not traded during a period.
